## Bleach efficacy that's easy on surfaces

Using Fuzion™ eliminates the need to make tradeoffs between efficacy and surface compatibility. Fuzion™ is a pH-neutral formula that won't cause damage to common healthcare surfaces. It can be safely used on stainless steel, chrome, counter tops, sinks, mattress covers, glazed tiles — even clear plastics and glass.

In outside laboratory testing, Fuzion™ left significantly less residue on a clear acrylic surface compared to a quat/alcohol and a peracetic acid/hydrogen peroxide disinfectant:

Fuzion™ enables healthcare facilities to use bleach in more places, providing strong protection against the spread of pathogens on surfaces.
