

QuickConnect™ Mop Handles, Stainless Steel

Autoclavable handles for all QuickConnect mop head frames

Description

These highly polished and durable stainless steel autoclavable mop handles include telescoping and fixed-length styles, all of which are compatible with Contec's QuickConnect mop head frames for a variety of mopping systems. Telescoping handles consist of tubes that adjust to any length within the range of the handle. The fixed-length handle is economical and simple to use, while adjustable length handles enable easy cleaning of areas that are beyond the reach of fixed-length handles. The 100% pure Delrin (acetal) resin locking collar adjustment allows for any variety of handle lengths. All of the handles listed are autoclavable. The suggested autoclave cycle is 121°C for 30 minutes.

Technical Information		
Part No.	Description	Material
2644	2-piece telescopic handle, 16-30 in (41-76 cm)	Type 304 stainless steel; Delrin
